

Americase®

BATTERY BAG

Designed in response to the growing need for safe transportation of suspect or damaged defective (DDR) lithium-ion batteries. This consumer-friendly shipping solution is cost-effective and easy to use, making it the best choice for your high-volume battery or device return events.

- ✓ **Sized to Fit Your Products.** Various sizes available to accommodate the most common form-factors in consumer electronics (cell phones, tablets, and laptops).
- ✓ **Cost Savings.** Created with a special lay-flat design to ensure a small footprint and cost-effective shipping.
- ✓ **Time Savings.** Ready made for fast distribution and quick turnaround times on high quantities to ensure a quick response and minimal downtime.
- ✓ **Safe and Easy to Use.** Doesn't require a dangerous good professional to ship in most cases, even with damaged or defective equipment. Instructions included with each package.

SP-16011 & SP-20798

Each bag has received a DOT special permit for the safe transportation and return of lithium-ion batteries, whether they're kept inside or outside of equipment.

Proven Reliability for Peace of Mind

Exhaustively tested by our in-house labs to ensure performance against thermal runaway events.

Regulatory Expertise

We are the industry experts - we actively participate in the regulatory writing process and assist regulatory bodies in the implementation.

Providing **INNOVATIVE SOLUTIONS**
to complex problems

Americase®

Americase is in the business of creating innovative, problem-solving protection containers based on smart, practical thinking. We provide complex but effective answers to your lithium-ion battery shipping challenges so you can be sure each battery ships and arrives safely.

SOLUTIONS

Our solutions are custom engineered to fit your specific requirements and exhaustively tested to ensure they withstand rigorous shipping conditions with the highest level of safety.

100% Custom built to fit your specific application

Our Industry Expertise for Your Peace of Mind

We are the industry experts. We don't just research the industry standards and regulations; we actively contribute to the writing process and assist regulatory bodies in the practical application of these requirements. When you use Americase, you get the peace of mind that your hazardous materials, dangerous goods, or high value products, will be safely transported, stored, and moved through your manufacturing and supply chain with the complete confidence that you meet all current, and future regulations.

Full Suite of Lithium-Ion Shipping & Recall Solutions

Our deep understanding of regulatory compliance has given us the expertise to design our various solutions that meet regulations and provide our customers with the confidence that their products, DDR or not, will ship uneventfully.

Battery Bag – the convenient solution created to be quickly distributed to customers for easy returns.

Battery Box – the robust containment solution that pairs a minimal footprint with easy-to-assemble design for fast shipping to consumers or OEM distribution centers.

Battery Super Box – the most robust, thermally protective lithium-ion containment and shipping solution available on the market today.

With 50+ years of case design and manufacturing experience, a full in-house design and engineering department, precision fabrication, and one of the best production units in the industry, we offer the solutions to complex problems and capability to overcome any challenge.
