

Americase®

OIL & GAS INDUSTRY APPLICATIONS TRANSPORTATION & STORAGE CASES

Transporting equipment for use in the Oil & Gas industry can often be just as demanding as using the same equipment in the field.

We custom engineer and manufacture cases specifically to meet the unique and rigorous demands of Oil & Gas on- and off-shore operations, including kit boxes, custom electronics, Measurement While Drilling (MWD) tools, and other specialized equipment containers.

Customizable Interior for Application Flexibility

Our variety of interior options allows for customization to ensure each case holds up to specific application conditions.

Durable Construction to Protect Valuable Equipment.

Containers are built to withstand the rigorous wear and tear and ensure long field life in both off-shore and land-based environments.

Lightweight Aluminum. Each case is 1/3 of the weight of steel alternatives while designed for over 10 years of active use.

Longevity and Maximum ROI. IP56 compliant with waterproof construction and corrosion-resistant hardware.

Flexibility & Expertise to Meet Your Needs

Full design & build capabilities combined with our extensive industry experience to custom engineer containers especially for your unique requirements.

Proven Reliability for Peace of Mind

Each case is meticulously designed and exhaustively tested by our in-house labs to meet the highest standards to ensure your products arrive safely.

Regulatory Expertise

We are the industry experts - we actively participate in the regulatory writing process and assist regulatory bodies in the implementation.

Providing **INNOVATIVE SOLUTIONS** to complex problems

Americase®

At Americase, we engineer containers that ensure the safety of your valuable, mission-critical oil and gas equipment while remaining easy to use. With each custom project, we ensure shipment by common carriers and company trucks, the security and damage prevention of your high-value tools, and durable lightweight designs to balance longevity and shipping costs.

SOLUTIONS

We will create custom cases that meet the exact needs of each Oil & Gas industry customer, no matter how simple or complex your storage or transportation challenge may be.

Our Industry Expertise for Your Peace of Mind

We are the industry experts. We don't just research the industry standards and regulations; we actively contribute to the writing process and assist regulatory bodies in the practical application of these requirements. When you use Americase, you get the peace of mind that your hazardous materials, dangerous goods, or high value products, will be safely transported, stored, and moved through your manufacturing and supply chain with the complete confidence that you meet all current, and known, upcoming regulations.

100% customizable design, including interior configuration, to best fit your specific needs and requirements.

Rugged, waterproof construction for 10+ years of field life.

Corrosion-resistant hardware for maximum longevity and ROI.

Lightweight yet durable welded aluminum design - 1/3 weight of steel

Each case can be lifted either by forklift, hoist, or crane, depending on the weight.

With 50+ years of case design and manufacturing experience, a full in-house design and engineering department, precision fabrication, and one of the best production units in the industry, we offer the solutions to complex problems and capability to overcome any challenge.
